RE: Harco Property Site Investigation for Removal Action
Old Mill Road, Wilton, CT

Dear Ms. Blais:

This letter is to confirm and outline the site visit scheduled for March 31 and April 1, 1992 at the Harco property.

On March 30, two contractors will arrive in the early afternoon to perform a grid system for sampling orientation. On March 31, at 8:30 a.m. we plan to commence sampling areas of concern. The sampling will be done to define the extent of soil contamination. Surface and core samples will be collected to identify the extent and depth.

Surface and residential well water samples will be collected on-site and from homes located off-site on Old Mill Road.

We plan to also identify and sample any seepage at the base of the exposed ledge rock along Old Mill Road that may be related to the site.

I have contacted the local board of health sanitarian, Allyson Eisenbach, who will help to coordinate community relations and to identify potential site area sources that may be sampled.

If any questions arise, please do not hesitate to contact me at (617) 860-4308.

Sincerely,

Paul R. Groulx, On-Scene Coordinator
Emergency Planning and Response Branch
Site Evaluation & Response Section I
